Subject: Öko-Tex STANDARD 100 certificate (new version, Edition 01/2019)

Product(s):

PGX-5KR Ink series,

Dear Sir / Madam,

The prerequisites for granting the quality label passed for harmful substances according to Öko-Tex100 are fixed in the Öko-Tex Standard 100. These standards comprise the quality control, the test procedures and the required documentary evidence.

The standards or product classes, respectively, contain limit values of ecologically harmful substances such as

Heavy metals
Pesticides
Formaldehyde

Fixed for textile goods depending on their intended final use

e.g. product class I – baby clothes
 product class IV – decoration materials

These standards also include color fastness.
If the basic materials and products such as

Fabric
Dyestuff
Textile auxiliary

Do not contain any substances that exceed the permissible limit values during correct application in compliance with the instructions, the final product made from these materials is supposed to be also free of substances.

However, the data specified by the supplier alone do not guarantee the granting of the quality label.

The limit values of the noxious substances fixed in the Oeko-Tex standards for Oeko-Tex articles are not exceeded if the product is correctly applied according to the instructions.

Should you have any question regarding the content of this letter, or any other Oeko-Tex related subject, please do not hesitate to contact us.

This document is valid until the requirement of Oeko-tex Standards 100 are changed.

Yours faithfully,

d.gen, Inc.
